## Audit Updates

Initial Audit	06 May 2024
---------------	-------------

## Overview

The FLOKIBOT token symbolized as FLOKIBOT, is a distinguished SPL (Solana Program Library) token initialized using the `TokenkegQfeZyiNwAJbNbGKPFXCWuBvf9Ss623VQ5DA` Token Program on the Solana blockchain, with a supply of `TOKEN_NUMBER` tokens. The token uses the URL

<https://bafkreiavygz2en5nj6gcvilds7mnmf6i2edoraxw3lzufsjsrw432jrlmy.ipfs.nftstorage.link>,

which points to a decentralized storage service, while the image

<https://bafkreiavygz2en5nj6gcvilds7mnmf6i2edoraxw3lzufsjsrw432jrlmy.ipfs.nftstorage.link>

is used for visual identification of the token across platforms and marketplaces. Overall, the solana token is a distinct entity within the Solana network, identifiable by its unique characteristics as outlined in its metadata.

# Metadata

The Metaplex Metadata provides details of the characteristics of the FLOKIBOT token, a distinctive digital asset on the Solana blockchain tailored for utilizing the Metaplex Metadata. This metadata includes crucial information necessary for the asset's seamless integration and operation within the Solana ecosystem.

Specifically, the metadata was initiated by declaring the `6fuEVzEXKLzhmjaid1tNFMUjmWDT54SUnxamK2ERTD1` as the update authority attribute, which points to the account authorized to modify the metadata. The mint attribute specified the account `BuvCN58S4o3jstuVetSd4ZCAWF5YHBTiGAddPGh5aZbf` authorized for the initial token mint. The asset imposes `sellerFeeBasisPoints` of 0 basis points, indicating no transaction fee for trading is set. The metadata indicates that the asset has not yet undergone its primary sale as indicated by the `primarySaleHappened` value set to 0, and is marked as mutable since `isMutable` is 1, allowing for future changes to the metadata. The `editionNonce` of 252 signifies a unique edition, while the `tokenStandard` of 2, aligns with a specified token standard within the Solana blockchain, ensuring its compatibility and standardization across the network. This detailed metadata structure offers a comprehensive overview of the token's key features and its operational framework within the Metaplex ecosystem on Solana.

```
{
  "key": 4,

```

Field	Value	Description
key	4	Account discriminator that identifies the type of metadata account
updateAuthority	6fuEVzEXKLzhmjaid1tNFMUj mWDT54SUnxamK2ERTD1	The public key that is allowed to update this account
mint	BuvCN58S4o3jstuVetSd4ZC AWF5YHBTiGAddPGh5aZbf	The public key of the Mint Account it derives from
name	FLOKIBOT	The on-chain name of the token
symbol	FLOKIBOT	The on-chain symbol of the token
uri	<a href="https://bafkreiavygz2en5nj6gcvids7mnmf6i2edoraxw3lzufsjrsw432jrlmy.ipfs.nftstorage.link">https://bafkreiavygz2en5nj6gcvids7mnmf6i2edoraxw3lzufsjrsw432jrlmy.ipfs.nftstorage.link</a>	The URI to the external metadata. This URI points to an off-chain JSON file that contains additional data following a certain standard
sellerFeeBasisPoints	0	The royalties shared by the creators in basis points — This field is used by most NFT marketplaces, it is not enforced by the Token Metadata program itself
primarySaleHappened	0	A boolean indicating if the token has already been sold at least once. Once flipped to True, it cannot ever be False again. This field can affect the way royalties are distributed
isMutable	1	A boolean indicating if the metadata account can be updated. Once

		flipped to False, it cannot ever be True again
editionNonce	252	Unique identifier for this edition
tokenStandard	2	The standard of the token

## UA - Update Authority

Criticality	Medium
Status	Unresolved

### Description

The contract is set up in a way that grants the update authority, with the address `6fuEVzEXKLzhmjaid1tNFMUjmWDT54SUnxamK2ERTD1`, continued access to alter key metadata fields. This situation leaves the token exposed to potential hazards, as this address has the power to adjust critical attributes such as the token's name, symbol, description, and image. Without revoking these privileges from the update authority, there's a risk of unauthorized or harmful changes that could undermine the token's integrity and its credibility within the market.

### Recommendation

It is recommended to revoke the update authority privileges. This action would ensure a consistent security posture across the contract's operational aspects, eliminating the discrepancy that currently allows for undue modification privileges. Implementing this recommendation would align the contract's security measures, providing a more robust defense against unauthorized changes and enhancing the overall security of the contract's operational environment.

How to revoke the Update Authority:

<https://www.quicknode.com/guides/solana-development/anchor/how-to-make-immutable-solana-programs#remove-the-update-authority-of-a-solana-program>

## ITA - Initial Token Allocation

<b>Criticality</b>	Minor / Informative
<b>Status</b>	Unresolved

### Description

The account `AMNZutdmSttUGnz7b2XUdZquVTYA5kBvx7AwcvbszDHx`, holds a large portion of the total supply. This concentration of a huge supply in one address raises significant concerns about centralization within the token's ecosystem. Such a scenario creates a risk of market manipulation and could lead to other adverse effects, potentially undermining the token's decentralized nature and the overall health of its ecosystem.

Token Account	Quantity	Percentage
AMNZutdmSttUGnz7b2XUdZquVTYA5kBvx7AwcvbszDHx	9,895,000,000	98.95%

### Recommendation

It is recommended to distribute the tokens more broadly to achieve a more decentralized token holding structure. This can mitigate the risks associated with centralization and ensure a more stable and secure ecosystem for all participants. If the new address consists of a team's wallet address, then the team should carefully manage the private keys of that account. We strongly recommend implementing a robust security mechanism to prevent a single user from accessing the contract admin functions, such as a multi-sign wallet so that many addresses will confirm the action.

## Summary

The FLOKIBOT token, built on the Solana network, leverages a solid architecture initiated via the Token program. This audit rigorously evaluates its performance, security, and compliance with best practices. The investigation aims to identify and address any operational vulnerabilities, performance bottlenecks, and areas for optimization, ensuring the token's robustness and reliability in the Solana ecosystem.

The token program analysis reported no compiler errors or critical issues.

This report may not be transmitted, disclosed, referred to or relied upon by any person for any purposes nor may copies be delivered to any other person other than the Company without Cyberscope's prior written consent. This report is not nor should be considered an "endorsement" or "disapproval" of any particular project or team. This report is not nor should be regarded as an indication of the economics or value of any "product" or "asset" created by any team or project that contracts Cyberscope to perform a security assessment. This document does not provide any warranty or guarantee regarding the absolute bug-free nature of the technology analyzed, nor do they provide any indication of the technologies proprietors' business, business model or legal compliance. This report should not be used in any way to make decisions around investment or involvement with any particular project. This report represents an extensive assessment process intending to help our customers increase the quality of their code while reducing the high level of risk presented by cryptographic tokens and blockchain technology.

Blockchain technology and cryptographic assets present a high level of ongoing risk. Cyberscope's position is that each company and individual are responsible for their own due diligence and continuous security. Cyberscope's goal is to help reduce the attack vectors and the high level of variance associated with utilizing new and consistently changing technologies and in no way claims any guarantee of security or functionality of the technology we agree to analyze. The assessment services provided by Cyberscope are subject to dependencies and are under continuing development. You agree that your access and/or use including but not limited to any services reports and materials will be at your sole risk on an as-is where-is and as-available basis. Cryptographic tokens are emergent technologies and carry with them high levels of technical risk and uncertainty. The assessment reports could include false positives, false negatives and other unpredictable results. The services may access and depend upon multiple layers of third parties.

# About Cyberscope

Cyberscope is a blockchain cybersecurity company that was founded with the vision to make web3.0 a safer place for investors and developers. Since its launch, it has worked with thousands of projects and is estimated to have secured tens of millions of investors' funds.

Cyberscope is one of the leading smart contract audit firms in the crypto space and has built a high-profile network of clients and partners.
