## Overview

The `Lucas the Lion` token symbolized as `LUCAS`, is a distinguished token initialized using the `TokenzQdBNbLqP5VEhdkAS6EPFLC1PHnBqCXEpPxuEb` Token 2022 Program on the Solana blockchain, with a fixed supply of `1,000,000,000` tokens since the mint has been disabled. This ensures a stable and unchangeable total supply, enhancing its value proposition within the ecosystem. The token uses the URL <https://bafkreic4fjfs7rdph6ze5jcoy4wgxh4jstlixiltufyei665eglj76sii.ipfs.nftstorage.link>, which points to a decentralized storage service while the <https://bafybeidsmsvijz7dhwrc5wy6ski5qblxcwpou26kpxyjn7w6pq2g6agbkm.ipfs.nftstorage.link> image is used for visual identification of the token across various platforms and marketplaces. Overall, the project is a distinct entity within the Solana network, identifiable by its unique characteristics as outlined in its metadata. The contract's mint authority has been renounced. The information regarding the transaction can be accessed through the following link: <https://solscan.io/tx/2eo5RzDF8XjomMb6v9we4U9VU635VBbab7T948AjPLore4nATmh3q8kS5Q74wfouCAg1zRtATEb3MbaFX6iPhQv>

# Metadata

The Metaplex Metadata provides details of the characteristics of the `Lucas the Lion` token, a distinctive digital asset on the Solana blockchain tailored for utilizing the Metaplex Metadata. This metadata includes crucial information necessary for the asset's seamless integration and operation within the Solana ecosystem. The mint attribute specifies the account `4Rko5UGhDZio3cbeaJvbWjmiGbuax626QSQF3r6nQ3MV` authorized for the initial token mint. This detailed metadata structure offers a comprehensive overview of `Lucas the Lion` key features and its operational framework within the Metaplex ecosystem on Solana.

```
{
  "mint": "4Rko5UGhDZio3cbeaJvbWjmiGbuax626QSQF3r6nQ3MV",

      torage.link"
  }
}
```

## Extensions

Additionally to Metaplex Metadata, the token has extensions. Specifically, the asset imposes `100` basis points for transfer fee calculation ( `transferFeeBasisPoints` : 100), which means that the transfer fee is 1%. Furthermore, the `maximumFee` is set to `268435456` , which is the maximum fee per transfer. The `transferFeeConfigAuthority` has been renounced and as a result, the fees configuration cannot change.

Severity	Unresolved	Acknowledged	Resolved	Other
● Critical	0	0	0	0
● Medium	0	0	0	0
● Minor / Informative	2	0	0	0

## ITA - Initial Token Allocation

<b>Criticality</b>	Minor / Informative
<b>Status</b>	Unresolved

### Description

The token account 73KJ5eiiH3fL9pFkMg5ZDZJenGCkm6qG5dNkYf2dJaAX, holds a large portion of the total supply. This concentration of a huge supply in one address raises significant concerns about centralization within the token's ecosystem. Such a scenario creates a risk of market manipulation and could lead to other adverse effects, potentially undermining the token's decentralized nature and the overall health of its ecosystem.

Token Account	Quantity	Percentage
73KJ5eiiH3fL9pFkMg5ZDZJenGCkm6qG5dNkYf2dJaAX	599,999,999.73	59.9999%

### Recommendation

It is recommended to distribute the tokens more broadly to achieve a more decentralized token holding structure. This can mitigate the risks associated with centralization and ensure a more stable and secure ecosystem for all participants. If the new address consists of a team's wallet address, then the team should carefully manage the private keys of that account. We strongly recommend implementing a robust security mechanism to prevent a single user from accessing the contract admin functions, such as a multi-sign wallet so that many addresses will confirm the action.

## RWWA - Renounced Withdraw Withheld Authority

Criticality	Minor / Informative
Status	Unresolved

### Description

The `TransferFeeConfig` extension is designed to facilitate the collection of fees, where every token transfer incurs a fee. The `transferFeeConfigAuthority` has been renounced, meaning that the configuration of fees cannot change. Additionally, the `withdrawWithheldAuthority` has been renounced. The renouncement of the `withdrawWithheldAuthority` effectively nullifies the ability to withdraw any accumulated transfer fees. The lack of authority to manage fee withdrawals could imply, that the fees accumulated would remain perpetually locked within the system. This configuration could inadvertently undermine the intended utility of the transfer fees.

```
{
  "extension": "transferFeeConfig",
  "state": {
    "newerTransferFee": {
      "epoch": 592,
      "maximumFee": 268435456,
      "transferFeeBasisPoints": 100
    },
    "olderTransferFee": {
      "epoch": 592,
      "maximumFee": 268435456,
      "transferFeeBasisPoints": 100
    },
    "transferFeeConfigAuthority": null,
    "withdrawWithheldAuthority": null,
    "withheldAmount": 0
  }
}
```

### Recommendation

it is recommended to reassess the token's economic models to ensure they align with the intended utility and long-term viability of the token, that revolves around the renouncement of the `withdrawWithheldAuthority`.

## Summary

The "Lucas the Lion" token, built on the Solana network, implements a robust smart contract structure that was initialized using the Token program, with analysis revealing 2 minor/informative issues.

This report should not be used in any way to make decisions around investment or involvement with any particular project. This report represents an extensive assessment process intending to help our customers increase the quality of their code while reducing the high level of risk presented by cryptographic tokens and blockchain technology.

Blockchain technology and cryptographic assets present a high level of ongoing risk. Cyberscope's position is that each company and individual are responsible for their own due diligence and continuous security. Cyberscope's goal is to help reduce the attack vectors and the high level of variance associated with utilizing new and consistently changing technologies and in no way claims any guarantee of security or functionality of the technology we agree to analyze. The assessment services provided by Cyberscope are subject to dependencies and are under continuing development. You agree that your access and/or use including but not limited to any services reports and materials will be at your sole risk on an as-is where-is and as-available basis. Cryptographic tokens are emergent technologies and carry with them high levels of technical risk and uncertainty. The assessment reports could include false positives, false negatives and other unpredictable results. The services may access and depend upon multiple layers of third parties.

# About Cyberscope

Cyberscope is a blockchain cybersecurity company that was founded with the vision to make web3.0 a safer place for investors and developers. Since its launch, it has worked with thousands of projects and is estimated to have secured tens of millions of investors' funds.

Cyberscope is one of the leading smart contract audit firms in the crypto space and has built a high-profile network of clients and partners.
